

It's important to me to show the community that we here at Point Breeze, we care about our community.

There are awesome organizations and businesses like Point Breeze Credit Union, that are doing the right thing, that are supporting organizations that are community based, that are helping the people that are in our community that need help.

My name is Lennore Brownley. I'm the office manager at the Owings Mills Point Breeze Credit Union.

Hi, I am Brock Yetso, President and CEO at Ulman Foundation. The mission of Ulman Foundation is to create a community of support for young adults and their loved ones affected by cancer.

The reason I picked the Ulman Foundation was because my mom had cancer back in 2000. They said, 'hey, she's not gonna make it' because the chemo destroyed her body. But I had a talk with my mom and said, 'hey, you hang in there because I'll be here every step of the way.' And she did. So she survived that. And then 10 years later she was diagnosed with breast cancer. She beat that.

Ulman Foundation was founded by one of my dear friends Doug Ulman, who was a three time cancer survivor. And my mom was diagnosed with stage four colorectal cancer, but Ulman Foundation was in my corner, in our family's corner. They helped us navigate one of the most challenging moments in my life.

My values align with the Ulman Foundation because they give back just like Point Breeze.

Our programs and our partnerships are 100% free of charge to our patients and families. And those programs would not be possible without the generosity of individuals, but most importantly corporate partners in the community. So the generous donation of Point Breeze Credit Union makes our work possible.

I just believe in helping people and making them feel better in any way I can. I'm in the Healing Hearts organization— where we go around to different hospitals, different houses. Anyone who's not feeling well, just go and talk to them, cheer them up a little bit.

We are meeting patients and families where they are, whether that's in the cancer center, in the community, or in our own facilities. The work that we do is so personal, right? A cancer diagnosis. And so to feel and hear the appreciation that we have from individuals, corporate partners, community organizations really makes our work meaningful, but really inspires and fuels us to, to do it every single day.

Our commitment to our members to show that our members, that we are here for them. We are here to take care of all their financial needs, to let them know that we are not just a bank, that we are family.
