

When Point Breeze came to us and offered to fund the building of our flagship greenhouse in our greenhouse growing program, we were beyond thrilled. Um having these greenhouses on site allow us to not only grow food all throughout the seasons, because the need really never stops, but it allowed us to expand our educational programs. Uh, to work with many people all throughout the region to really grow some very high quality produce, to increase our capacity for donations and really to just continue to impact more people throughout the region. Point Breeze Credit Union, we cannot thank you enough. We are thrilled to be partnering with you guys to be able to, you know, start off this program in a really amazing way. These greenhouses have impacted so many people, they've impacted our operations here. Our volunteers have been so engaged and interested in participating in our harvest in those greenhouses and we're just so excited for what the future holds and what we've been able to accomplish so far but we're able to grow from there.
